

VOUCHER

FESTOOL

Purchase 300 sheets of Multi-Jetstream abrasives and receive a Multi-Jetstream pad for free!

Built-in dust conveying system

A flow is created between the intake and exhaust air channels similar to ventilation of a room. It collects the dust and actively conveys it to the extraction channels.

25% cooler sanding pad

The Multi-Jetstream principle supplies cool intake air for the sanding pad, abrasive and work surface and prevents clogging.

Dust free, 6x faster

Thanks to the fast dust extraction, the sanding pad and abrasive remain free of dust for longer periods.

Multi-Jetstream sanding system

The perceptible differences include the smooth running, guide behavior and hardly noticeable vibrations. A minimal 0.3 mm axial run out was measured compared to up to 1 mm with other systems. The optical difference is the dust-free sanding surface.

All of this proves that the Multi-Jetstream principle in the system with Festool abrasives, sanders and mobile dust extractors is superior to any other combination. Perceptible, measurable and visible. Reflected in improved health and work results.

To receive this offer, show this voucher to your participating dealer, get the FOC goods with your purchase and send us the warranty card back.
